How to make
Paper Chains

How to make your paper chain:

1 Take your chosen colours of A4 paper and cut equal thickness strips either length (for bigger loops) or width (mini loops!) ways.

2 Curl the paper back on itself to create a loop.

3 Use a small square of tape or a glue stick to secure the ends together to create a ring.

4 Take another strip of paper and thread it through the first loop, before bending it back on itself to create another ring.

5 Continue to repeat the steps until you have no paper strips left, and hang your beautiful decoration up for your celebration!
